

Interfaces

Python API · command-line interface · plugins (readers, generators, metrics, anomalies)

Ingestion

CSV, JSONL,
Parquet
YAML mapping
pseudonymised

Analysis

sessions
n-grams
transitions
timing, groups

Generators

independent
Markov (k)
semi-Markov
start times

Validation

fidelity
metrics
privacy
indicators

Benchmark

versioned
protocol
held-out
learners

Real logs

LMS exports

Scenarios (experimental layer)

anomalies · controls
calendars · profiles

Evaluation

detectors: ROC-AUC, AP
clustering: ARI, NMI

transforms models

labels

Core: immutable data models · seeds · fingerprints · JSON artifacts
